## The Antideluvian World

**For this they willfully forget..**

..that there were heavens from of old, and an earth formed out of water and amid water, by the Word of God; by which means **the world that then was, being flooded with water, perished.**

2 Peter 3:5+6

### Listener Q + A

#### Listener Comment - programs on ufos

*The latest programs on ufos are so current to events coming soon upon earth, fantastic!!*

#### Listener Comment - Magen David Link?

*Greetings from South Africa! I'm enjoying your programs as always, especially the ones that involve LOTS of study of the Word. I realize that's not always possible but those are my favorite :) I really enjoyed #251 The Retainer. Thank you for your faithfulness in sharing with us! I know you are very busy but I wanted to direct a Jewish friend who is a believer to the article you wrote explaining the Tsiyon symbol/logo. She has been told that the Magen David is inspired by the kundilini spirit which she has found to be very upsetting but she is open to the truth - I wanted to share the article with her but I can't find it. Please can you send me the link.*

#### Tsiyon Answer - Magen David Link

As always, it is nice to hear from you. The link you are looking for is at:

#### Listener Comment - Muslim inbreeding

*The following article by Bryan Fisher was submitted by one of our listeners. Abridged here for length.*

Nicolai Sennels is a Danish psychologist who has done extensive research into a little-known problem in the Muslim world: the disastrous results of Muslim inbreeding brought about by the marriage of first-cousins.

This practice, which has been prohibited in the Judeo-Christian tradition since the days of Moses, was sanctioned by Muhammad and has been going on now for 50 generations (1,400 years) in the Muslim world.

This practice of inbreeding will never go away in the Muslim world since Muhammad is the ultimate example and authority on all matters, including marriage.

The massive inbreeding in Muslim culture may well have done virtually irreversible damage to the Muslim gene pool, including extensive damage to its intelligence, sanity, and health.

According to Sennels, close to half of all Muslims in the world are inbred. In Pakistan , the numbers approach 70%. Even in England , more than half of Pakistani immigrants are married to their first cousins, and in Denmark the number of inbred Pakistani immigrants is around 40%.

The numbers are equally devastating in other important Muslim countries: 67% in Saudi Arabia , 64% in Jordan and Kuwait , 63% in Sudan , 60% in Iraq , and 54% in the United Arab Emirates and Qatar .

According to the BBC, this Pakistani, Muslim-inspired inbreeding is thought to explain the probability that a British Pakistani family is more than 13 times as likely to have children with recessive genetic disorders. While Pakistanis are responsible for three percent of the births in the UK , they account for 33% of children with genetic birth defects.

The risk of what are called autosomal recessive disorders such as cystic fibrosis and spinal muscular atrophy is 18 times higher and the risk of death due to malformations is 10 times higher.

Other negative consequences of inbreeding include a 100 percent increase in the risk of stillbirths and a 50% increase in the possibility that a child will die during labor.

Lowered intellectual capacity is another devastating consequence of Muslim marriage patterns. According to Sennels, research shows that children of consanguinous marriages lose 10-16 points off their IQ and that social abilities develop much slower in inbred babies.

The risk of having an IQ lower than 70, the official demarcation for being classified as “retarded,” increases by an astonishing 400 percent among children of cousin marriages.

(Similar effects were seen in the Pharaonic dynasties in ancient Egypt and in the British royal family, where inbreeding was the norm for a significant period of time.)

In Denmark , non-Western immigrants are more than 300 percent more likely to fail the intelligence test required for entrance into the Danish army.

Sennels says that “the ability to enjoy and produce knowledge and abstract thinking is simply lower in the Islamic world.” He points out that the Arab world translates just 330 books every year, about 20% of what Greece alone does.

In the last 1,200 years years of Islam, just 100,000 books have been translated into Arabic, about what Spain does in a single year. Seven out of 10 Turks have never even read a book.

Sennels points out the difficulties this creates for Muslims seeking to succeed in the West. “A lower IQ, together with a religion that denounces critical thinking, surely makes it harder for many Muslims to have success in our high-tech knowledge societies.”

Only nine Muslims have ever won the Nobel Prize, and five of those were for the “Peace Prize.” According to Nature magazine, Muslim countries produce just 10 percent of the world average when it comes to scientific research (measured by articles per million inhabitants).

In Denmark , Sennels’ native country, Muslim children are grossly overrepresented among children with special needs. One-third of the budget for Danish schools is consumed by special education, and anywhere from 51% to 70% of retarded children with physical handicaps in Copenhagen have an immigrant background.

Learning ability is severely affected as well. Studies indicated that 64% of school children with Arabic parents are still illiterate after 10 years in the Danish school system. The immigrant drop-out rate in Danish high schools is twice that of the native-born.

### Be Prepared

Mental illness is also a product. The closer the blood relative, the higher the risk of schizophrenic illness. The increased risk of insanity may explain why more than 40% of the patients in Denmark 's biggest ward for clinically insane criminals have an immigrant background.

The U.S. is not immune. According to Sennels, "One study based on 300,000 Americans shows that the majority of Muslims in the USA have a lower income, are less educated, and have worse jobs than the population as a whole."

Sennels concludes:

There is no doubt that the wide spread tradition of first cousin marriages among Muslims has harmed the gene pool among Muslims. Because Muslims' religious beliefs prohibit marrying non-Muslims and thus prevents them from adding fresh genetic material to their population, the genetic damage done to their gene pool since their prophet allowed first cousin marriages 1,400 years ago are most likely massive. (This has produced) overwhelming direct and indirect human and societal consequences.

**From Eliyahu**

There is still evidence of the world that once was, the antideluvian world, until it was destroyed by God. Most people choose to ignore that world, as if it had never existed. Yet, it did exist and it's message for our world is clear: There is a Judge and judgment of this present world must come. I invite you and your family to hear more about the antideluvian world in our latest Tsiyon Radio program.

Blessings and Shalom,

Eliyahu ben David
