**From Eliyahu:**

Shalom friends,

In a historic speech in May of 1961 Pres. John F. Kennedy committed America to landing astronauts on the Moon by 1970. I was a kid of 11 years old at the time and I still remember the amazement and excitement that speech aroused in the entire nation, and probably the entire world. Within a ten year period the country was to go from little more than zero to putting a man on the Moon and bringing him back again. Realize we didn't even have color TV yet, no cassette tapes, no personal computers or cell phones. There were still a lot of people in America who didn't live on a paved road, or even have electric lights. Truly, the very idea of a moonwalk back then was science fiction, not science fact. In that black-and-white world the startling announcement by President Kennedy started a countdown toward what seemed at first an unattainable goal. Yet, all I saw in the world around me was excitement and wonderment about going to the Moon, and overwhelming popular support of NASA and the Apollo space program that was racing against the clock to get the USA to the Moon and back. The countdown had begun and it would change everything.

A lot can change in one decade, and it certainly did through the 60s. The assassinations of John Kennedy, his brother Bobby Kennedy, and Martin Luther King shook the nation. The Viet Nam War raged and thousands of people were tragically killed. Israel defeated all of it's enemies and liberated Jerusalem in the 6 Day War of 1967. Woodstock, flower power, drugs, sex and rock-n-roll, and let's not forget feminism - in less than 10 years the change in the world seemed like the end of the world had come. Yet, somehow none of that changed the route to the Moon. Ask most anyone who was alive back then where they were on the afternoon of July 20, 1969 and they will tell you they were watching the Apollo 11 Moon landing on TV. I can still hear the voice of Walter Cronkite narrating the story and the anticipation we all felt as we got closer to that historic moment when finally we heard the amazing announcement crackle from the moon to NASA on Earth - "The Eagle has landed."

It was all live as we watched Neil Armstrong's first steps on the Moon, recorded by a television camera whose signal was transmitted back to NASA Mission Control in Houston, as Armstrong spoke the words; "That's one small step for man, one giant leap for mankind."

Why am I taking you on this nostalgic trip through the 60s? Not because the 50th anniversary of the Apollo Moon Landing will occur this year. Rather, because it marked the climax of the best example I've seen of what a decade countdown is like, and how much things can change in such a short time. Since the year 2,000 the world has already been changing at break-neck speed. However, the decade coming up will make those years look like a turtle race. The next decade is destined to be a countdown - a countdown to the Great Tribulation. How do I know? I know because the Book of Revelation tracks perfectly with events that began to unfold in the 60s, accelerated since 2008, and are set to go into turbo-drive for the upcoming decade. Just as the decade of the 1960s brought great changes, the decade of the 2020s will change the entire world, to force the people of the world to accept one-world global government. That, in turn will force a showdown with the Creator, and that will bring on the Great Tribulation of the Book of Revelation. Actually, the decade countdown itself will be a time of tribulation and even death for countless numbers, with science fiction horrors from movies and books, regularly turning into real things and events. At the same time, the Creator will be making a way out for those who act early to choose His way. For them, there will be a place of safety through the nightmare that is about to come upon the whole Earth. What I'm talking about here, with this upcoming decade countdown, is nothing less than the set-up for the end of the world. If you just go along with the planned changes of the elite agenda for the upcoming decade you are doomed. To get through this, you

will have to get ready now, you will have to become a soldier of the Kingdom, you will have to become an Overcomer. Tsiyon is here to help you, but know this, you are quickly running out of time.

Tonight I will explain all of this to you. I will show you the countdown to the Tribulation in Revelation, and we will consider the facts together which clearly show prophecy being systematically fulfilled before our eyes. Honestly, nobody else has this. They just don't see it because it wasn't given to them to see it. It was given to me, so I can share it with you, if you will only come and listen.

Join me tonight, along with any persons you invite, to our live video stream at [tsiyon.net](http://tsiyon.net), at 8 pm cst. Tell your friends to register free at <https://tsiyon.net/register/> to take in this special broadcast tonight.

Everything is about to change. You can be ready.

Shalom,

Eliyahu

# Chinese Facial Recognition Will Take over the World in 2019

The leaders in artificial intelligence of facial recognition; *Microsoft, Facebook, Amazon or Google?* Think again.

Kristin at Futurism said something I thought was funny:

***We already knew China was helping African nations spy on their citizens. Now it turns out it might also be helping the United States.***

## The Chinese Gods in the Data Age

The best facial recognition startups are in China, by a long-shot. As their software is less biased, global adoption is occurring via their software. This is evidenced in 2019 by the New York Police department in NYC for example, according to the South China Morning Post. For tech insiders, we knew this would occur since SenseTime and Face++ are just so far ahead of the game. Chinese ethics on AI here impacts the creation of a global surveillance world where data-monitoring in real-time will scale in the 2020s and 2030s.

A computer system that can track and identify any face anywhere is coming to global citizens. This is because capitalism isn't regulated, it's bullish on AI in an exaggerated sense where profits matter and efficiency fits the crime. As Chinese innovation start to get ahead, so too will Chinese ethics infiltrate the rest of the world.

In a world where business and technology trumps ethics and regulation, America is already being hacked. The mass surveillance state of data harvesting in real-time is coming. *Facebook* already rates and profiles us.

The golden age of consumer data harvesting might fuel new AI that not only exploits our attention, but our emotions and basic drives. American police departments adopting superior Chinese software in facial recognition is an early warning of how this could occur.

The surveillance tools are identical to those used in Sky Net in China, the largest video surveillance system on Earth, Chinese government research institutes and a company involved in the project said.

It's not necessarily dystopia but it's the new reality of techno-capitalism. The Chinese Government can fund companies in a way where they can scale faster now than American startups. From the age of biotech to smart healthcare, the majority of innovation could one day be coming out of China. Ironic that as the trade war escalates into a tech war, Chinese infiltration has already occurred. The Sky Net programme, now renamed Pingan Chengshi or Safe Cities, claimed to have connected 170 million cameras across China last year. By 2020, another 400 million units will be installed.

***Beijing plans to be able to identify anyone, anytime, anywhere in China within three seconds.***

## The Tech Wars come down to an AI-War

The SCMS article claims that the said mentioned Sky Net-style technology has been rolled out in River Park Towers, in the Bronx, the northernmost of New York's five boroughs. Thousands of Sky Net cameras, aided by artificial intelligence (AI) software, have monitored River Park since 2014, according to the Hikvision website. Smart cities with 24-7 monitoring are rather inevitable, but at what price?

The trade war will lead to a tech war which is a data war which leads to competing forms of artificial intelligence. The SCMP claims to have seen an official Chinese government document that reveals that the U.S. is currently using surveillance technology developed by Chinese company Hikvision.

Backdoor access for Police has been known since the NSA scandals. That police could access footage remotely and observe suspects in detail without a conspicuous police presence is sort of guaranteed, screw human rights. Monetization won't just kill privacy, it will do a lot worse.

While many facial recognition software systems appears to be racist and performs more poorly with people of 'color', it is claimed that Hikvision's software can actually spot and follow a person by face, figure/gait and can accurately identify people of all skin tones. US cell carriers still sell your location data, apps still harvest it, the decline of physical and virtual freedom is upon us. Ironically it's doubtful the U.S. has the capability of creating its own anti-China firewall for these kinds of technologies.

Blocking 5G Leader Huawei is one thing, but how do you block a consumer app company like ByteDance?

China has already 'won' the trade-war, because its winning the race to innovation. America doesn't regulate Amazon, Microsoft, Google or Facebook properly, that stunts innovation and ethics in technology where the West is now forced to copy China just to keep up.

### Have you seen this new video yet? - News Bytes

Emily Rose posts a new *NewsBytes* segment every week at our [Tsiyon Road Radio YouTube Channel](#). Emily makes these thought-provoking videos for everybody, but she especially wants to bring the same hope she has been blessed with to other young people through her NewsByte YouTube videos. If she was making videos about cooking, movies, kittens, or just about anything else, YouTube would be helping her to get her videos shown. However, since she is addressing topics of importance from a Biblical perspective, and she is not supporting the popular agenda, her video views are being suppressed on the platform. Pretty much all publishers classed as "conservatives" are experiencing this suppression throughout social media, including on YouTube - and this is also happening to Tsiyon. We need your help to spread the word about these videos. Please subscribe to our channel and watch these videos, then send the links to others, with an emphasis on young folks, so they will be exposed to this life-changing video series featuring Emily!

Here is Emily's latest video, produced just this week!

Overcome! - News Bytes

To see all of Emily's NewsBytes videos, and others that are coming out every week, click the Tsiyon graphic below, and please subscribe at YouTube to our channel. Together we can help Emily get these out to the people who need to see them!
