From Eliyahu

Ray Kurzweil famously predicts that by 2030, advancements in technology will enable humans to achieve biological immortality, significantly enhance cognitive abilities, and revolutionize healthcare

through nanotechnology. He is not the only one who thinks technology will grant immortality.

Here's a tour of 4 technologies people point to when they talk about "human immortality" (or at least "indefinitely long lifespan"). None of these can do that today; but these are the big theoretical paths people argue about.

1. Medical nanorobots (nanomedicine)

Kurzweil and other futurists imagine swarms of microscopic robots circulating in your bloodstream and tissues, constantly repairing damage: clearing plaques, killing cancer cells, fixing DNA errors, rebuilding worn-out cells. If every bit of biological wear and tear is fixed faster than it accumulates, your body would "never" decline from aging. In principle, if the nanobots are reliable and continuously updated, you could have a self-maintaining body that doesn't "run down" - aging becomes an engineering problem, not a fate.

"Advanced medical nanorobotics could completely remedy the effects of aging." - attributed to Ray Kurzweil.

2. Rejuvenation biotech & "longevity escape velocity"

Aubrey de Grey and others talk about treating aging as accumulated damage that can be periodically repaired - with senolytic drugs, stem-cell therapies, advanced diagnostics, etc. The theory is, if each round of therapy restores your body faster than it deteriorates, then every year medical progress adds "more than a year" to your remaining life. That state is sometimes called "longevity escape velocity": you never catch up to the "end" because each year buys you even more future years. In theory, that could mean open-ended life, limited only by accidents or extreme disasters. "Longevity escape velocity is a situation in which one's remaining life expectancy is extended longer than the time that is passing." - Aubrey de Grey

3. Mind uploading / whole-brain emulation

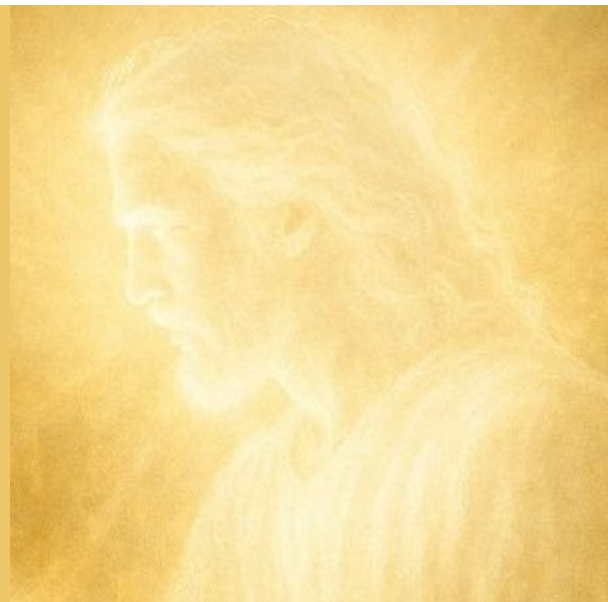

Here the body is optional. The proposal is to scan your brain in enough detail to reconstruct its structure and activity in a computer - a "whole-brain emulation". The emulated mind would think and feel like you (in the optimistic view), but on hardware that can be backed up, copied, and repaired. If the simulation keeps running on new

hardware as old hardware fails, then “you” (or at least your psychological continuity) could exist indefinitely in virtual environments or robotic bodies. Advocates like those behind the “2045 Initiative” explicitly describe mind uploading as a route to immortality. “Mind uploading represents, in practice, the surest and most guaranteed way to immortality.” - 2045 Initiative statement

4. Brain–computer interfaces & merging with AI

People like Ray Kurzweil and Elon Musk talk about “merging our brains with machines” via brain-computer interfaces and nanobots. The idea is that neural implants or nanorobots link your brain directly to the cloud, extend your thinking into vast external computation, and eventually might even “copy or mirror” your brain-state outside your biological head. If your mind becomes a hybrid biological-digital system with constant backups and the ability to migrate between substrates, then in theory you could survive even total loss of the original body or brain. “The Singularity... will occur when we merge our brain with the cloud.” - Ray Kurzweil

***“When
He is revealed,
we will be
like Him;
for we will
see Him
just as He is.”
1 John 3:2***

Time for a reality check.

None of these technologies, or any other, currently make humans immortal. Many scientists think true “immortality” (never dying from anything) is impossible for humans to achieve, even if we were to largely beat aging, because accidents, new diseases, and catastrophic events still exist. In practice, mainstream aging research

is mostly aimed at “healthspan” - keeping people healthier for longer - rather than attaining literal eternal life, because despite all predictions, beating death through technology has never been done.

That is not to say death has never been beaten - it has. Over 500 people saw Messiah after He had risen from the dead. Paul the apostle testifies:

“For I delivered to you as of first importance what I also received, that Christ died for our sins according to the Scriptures, and that He was buried, and that He was raised on the third day according to the Scriptures, and that He appeared to Cephas, then to the twelve. After that He appeared to more than five hundred brethren at one time, most of whom remain until now, but some have fallen asleep; then He appeared to James, then to all the apostles; and last of all, as to one untimely born, He appeared to me also.” (1 Corinthians 15:3-8)

Think about it. If Paul was making such a bold claim so close in time to the resurrection, that he and five hundred other people saw Yeshua alive after He was dead and buried, Paul had to be very confident that no one could contradict that. Plus, he and others were willing to literally stake their own lives on that claim that they had seen the risen Yeshua. They would not stop talking about it even when threatened with death. This is a very solid witness, indeed.

Then we have this witness of Peter the apostle:

“For we did not follow cunningly devised fables, when we made known to you the power and coming of our Lord Yeshua the Messiah, but we were eyewitnesses of his majesty. For he received from God the Father honor and glory, when the voice came to him from the Majestic Glory, “This is my beloved Son, in whom I am well pleased.” We heard this voice come out of heaven when we were with him on the holy mountain.” (2 Peter 1:16-18)

Here Peter is recounting what is often called “the Transfiguration” which he, along with apostles James and John had all witnessed

together. This event is reported in three of the four Gospels. It all started when Yeshua said:

“Most certainly I tell you, there are some standing here who will in no way taste of death, until they see the Son of Man coming in his Kingdom. After six days, Yeshua took with him Peter, Jacob, and Yochanan his brother, and brought them up into a high mountain by themselves. **He was transfigured before them. His face shone like the sun, and his garments became as white as the light.**” (Matthew 16:28, 7:1-2, 5, Mark 9:2–13, Luke 9:28–36)

Properly understood, the three witnesses saw Yeshua transfigured (*transformed*) into His risen Kingdom persona, manifesting His glory in that state in a shining radiance. And they also heard a voice from the Father saying, “This is my beloved Son, in whom I am well pleased. Listen to Him.” This voice is yet another witness to the truth of the risen Yeshua in Kingdom glory, namely the Father Himself. Have you put your faith in Yeshua and given your life to Him? If so, then He has given eternal life to you. The night before his death Yeshua prayed:

“Father, the time has come. Glorify your Son, that your Son may also glorify you; even as you gave him authority over all flesh, **he will give eternal life to all whom you have given him. This is eternal life**, that they should know you, the only true God, and him whom you sent, Yeshua the Messiah.” (John 17:1-3)

In Kingdom glory, Yeshua is transformed. Do we fully know and understand the fullness of that transformation? No we don't. We just know it is glorious. We also know this:

“Beloved, now we are children of God, and it is not yet revealed what we will be. But we know that, **when he is revealed, we will be like him; for we will see him just as he is.**” (1 John 3:2)

You - immortal in Kingdom glory *like Him* - now, that's an amazing hope.

Tonight our ladies discussion group will be talking about the amazing transfiguration of Yeshua. Their theme will be: *Messiah's Transfiguration*. Learn what this is all about and how it effects you. That's tonight at 8 Central, at Tsiyon.Net and other video platforms. This will surely build up your faith.

In His Name. Eliyahu
