From Eliyahu

The pace of change in today's world is accelerating like a runaway train, out of control. Nothing illustrates this more than the pace of automation. Artificial Intelligence (AI) is already disrupting jobs: Microsoft cut 9,000 roles in 2025 citing AI, and Salesforce eliminated 4,000 customer service jobs. A Stanford study found AI caused a 13% decline in early-career jobs, and 55,000 layoffs were linked to AI in

2025. AI keeps improving at an exponential rate, becoming more capable of doing more jobs better than humans, much more cost-effectively. This will likely create a job crisis through the rest of the decade and beyond, possibly with dire effects on society.

However, even that is not the worst of it. The pairing of AI with robotics makes this picture even more alarming. I know - that sounds like science fiction, only it's not. Amazon's automation plans are at the center of the 2027 robot surge narrative. Leaked internal documents reveal a strategy to replace up to 600,000 U.S. jobs with robots by 2027, primarily in warehouses and logistics, as part of a \$12.6 billion automation drive. This includes phasing out 160,000 new hires and automating 75% of its fulfillment network using advanced robots like Proteus and Sequoia. This is but one example. Other sectors are also seeing rapid integration. At the same time all of this is happening whistleblowers from the AI world keep telling us that this is a race to oblivion, and the powers that be are turning a blind eye to the dangers.

As I mentioned in my last Tsiyon News, in January 2026, the *Bulletin of the Atomic Scientists* moved the Doomsday Clock to **85 seconds to midnight**. This is the closest the secular world has ever stood to total catastrophe. In the halls of Oxford, researchers like Toby Ord calculate the odds of human extinction in our century at **1 in 6** - a literal roll of the die.

To the secular world, this is a call to panic. To the Bible believer, it is a confirmation: **Man's ability to govern his own world with his inventions has reached its mathematical limit**, and right now this is bringing on rapid changes upending the world as we have known it.

This amounts to a "Dark Turn" from progress to explosion. We are no longer in an era of "gradual change." Nick Bostrom, a leading voice in AI ethics, warns of an **"Intelligence Explosion"** - a point where technology begins to improve itself so rapidly that human beings are left behind in a matter of hours. Bostrom calls this the "Black Ball" in the urn of discovery: a technology that, once pulled out, cannot be put back and inevitably leads to a "dark turn."

The Bible describes this same "acceleration" as **birth pangs** (Matthew 24:8). Just as labor pains increase in both frequency and intensity until the moment of delivery, our era is defined by a "doubling rate" of crisis. Whether it is the expiration of the **New START nuclear treaty** (Feb 2026) or the blurring of safety standards in AI labs, we are witnessing the "great rush" toward what the prophets called the Day of the Lord.

The prophet Daniel was told that in the "time of the end," knowledge would "increase." In the original Hebrew, the word *shatit* implies a frantic running to and fro, a surge that overflows its banks. You could call it "The Knowledge Explosion" (Daniel 12:4).

For 1,900 years since Messiah walked the earth "knowledge" grew linearly. A man in 1700 lived much like a man in 100 AD. But today, we are in a vertical spike.

- **The Secular View:** This is "The Singularity" - the moment man becomes like a god through his own data.
- **The Biblical View:** This is the "over-reach" of the Tower of Babel. In Genesis 11, God noted that "nothing will be restrained from them, which they have imagined to do."

We are seeing the removal of "restraint" in real-time. The "dark turn" Bostrom fears is simply the Biblical reality that knowledge without the fear of God leads to the "mystery of iniquity." When man's power becomes "god-like" but his heart remains fallen, the result is not a utopia, but the "abomination of desolation." (2 Thess 2, Matt 24:15)

The trap of "total safety" is almost upon us. Because the secular world sees this rush toward oblivion, they are proposing a radical "fix": **Total Surveillance**. Bostrom and others suggest that to stop a single individual from using a "Black Ball" technology, the state must monitor every person, everywhere, at all times. Can you feel it? – That surveillance trap is slowly but surely tightening around us.

As students of the Word, we recognize this "solution" as the architecture of the **Antichrist system** (Revelation 13). The world is being conditioned to accept a digital panopticon in exchange for "safety." They are building a trap to get out of a trap. The "Total Surveillance" they suggest is the secular name for the Mark of the Beast system - a world where privacy and freedom are traded for a false peace and security.

Comparative Analysis: Signs of the Times (2026)

To see examples of how closely secular "facts" align with prophetic "truths," consider the current state of our world:

Modern Event (2026) - New START Treaty Expires

Secular Assessment - "end of nuclear guardrails."

Prophetic Parallel - "Distress of nations, with perplexity; the sea and the waves roaring" (Luke 21:25).

Modern Event (2026) - Generative AI Disinformation

Secular Assessment - "The collapse of objective reality"

Prophetic Parallel - "Because they received not the love of the truth... God shall send them strong delusion" (2 Thess. 2:10–11).

Modern Event (2026) - Black Ball Hypothesis

Secular Assessment - "Discovery that destroys the world"

Prophetic Parallel - "Except those days should be shortened, there should no flesh be saved" (Matt. 24:22).

Modern Event (2026) - High-Tech Surveillance

Secular Assessment - "The only way to ensure survival."

Prophetic Parallel - "no one will be able to buy or to sell, unless he has the mark" (Rev. 13:16–17).

If we are indeed in the "85-second" window, how do we live? We cannot rely on the systems of "Big Government" or "Big Tech" that produced these threats. Instead, we must develop **Spiritual Adaptability**:

1. **Practical Vigilance:** As the world moves toward "informational Armageddon," our reliance must shift from the "screen" to the **Scripture**. If it isn't anchored in the Word, don't trust it.
2. **The "Katechon" Confidence:** We must remember the "Restrainer" (2 Thessalonians 2:6). The world will not end by a "basement accident" - instead, the End Time scenario is being managed by the Creator.
3. **Relational Anchoring:** As technology seeks to "merge" human and machine, our resistance is found in fellowship with other Bible believing people who are preserving the image of God as sacred and inviolable. Real community with YHWH and other believers is key.

4. YHWH has a plan for saving a righteous Remnant. Ask Him to show you what that is, and to prepare you for it.

The secular experts are right to be afraid. They see the "Black Ball" and see the possible end of the species. We look at the same acceleration and see the **King at the Door**. The "Dark Turn" of the world is merely the shadow cast by the approaching Light. The Creator is not reacting to 2026; He is managing the fall to save the righteous. He is the Lord of Time, and He is the Lord of all.

Managing the fall is nothing new to Him. He has done it before. I'm talking about the Last Days of Israel's Monarchy Age. By studying that pattern of how YHWH unfolded that rush toward collapse we learn vital lessons that can help us to ride out this time of runaway change at the End of this Age. Tonight I'm going to break that down for our Tsiyon Members in an exclusive multi-media presentation just for you, entitled *Ridin' Change*.

We will be streaming this exclusive presentation for Tsiyon Members beginning at 7:45 Central, only on Tsiyon.Net - and NOT on other video platforms. Come and equip yourself for the runaway days just ahead.

In His Name, Eliyahu
